About Me

My name is Ali Reza, and I'm 21 years old. I would like to see how my work affects people's lives; I believe this is my main mission. One A motivated and creative developer who loves new challenges. Experience in cross platform , web application and platform development Large-scale using Javascript frameworks.

Experience

Founding Member - CTO (Full-Time)

AISA Solutions Inc. Dec 2023- Present

AISA is an AI-powered platform designed to make sign language learning and communication more accessible. It helps deaf and hard-of-hearing individuals communicate more effectively while also enabling anyone interested in sign language to learn, practice, and improve their skills through interactive lessons and AI-powered feedback.

- Led and managed an international remote engineering team across frontend, backend and AI.
- Built, launched, and maintained three major stable versions of the AISA platform across iOS, and Android.
- Helped scale AISA to more than 180,000 users across the App Store and Google Play.
- Developed and integrated AI-powered sign language recognition features for real-time practice and feedback.
- Built and maintained core product infrastructure, including authentication, analytics, and monitoring.
- Improved production AI accuracy, reliability, and performance while handling real-world mobile camera input.
- Built native mobile integrations for camera access, notifications, Google Sign-In, payments, and in-app experiences.

Software Developer (Full-Time)

Asan Pardakht (AP) June 2023 - Jan 2025

Asan Pardakht (AP) is one of the largest fintech super apps in the Middle East, serving more than 50 million users across a wide range of payment and financial services.

- Work as a Mid-Level Software Engineer on the TSP service, contributing to the development and improvement of large-scale financial products and services used by millions of users.
- Worked as a Front-End Developer on Tiran, helping build a tax services platform that became one of Iran's 12 officially verified Tax Service Providers.
- Contributed to Tiran's growth into one of the holding company's strongest revenue-generating channels.
- Previously worked with the POS team, contributing to payment-related products and services.

Software Developer (Part-Time)

Divar Sep 2022 - Nov 2022

Divar is one of Iran's largest online marketplaces, with more than 35 million users. The platform enables people to buy and sell new and used goods, discover local services, and connect directly with buyers, sellers, and service providers across a wide range of categories.

- Worked on fraud detection and prevention service, identify and reduce fraudulent activity across the platform.
- Contributed to systems and product improvements that reduced fraud by approximately 80% based on the latest internal results.
- Helped improve marketplace trust and safety by removing fraudulent activity and creating a cleaner experience for millions of users.

Software Developer (Part-Time)

Janan Gallery Feb 2020 - Sep 2022

Janan Gallery is an online jewelry marketplace with more than 500 daily visitors, built to modernize the jewelry shopping experience. Alongside traditional jewelry e-commerce, the platform introduced smart jewelry products, combining technology, personalization, and wearable design in a new category of connected jewelry.

- Built and launched two stable versions of the Janan Gallery e-commerce platform.
- Designed and developed a smart jewelry necklace, combining traditional jewelry with digital functionality.
- Improved the online shopping experience and contributed to a 50% increase in sales.
- Worked across product development, implementation, and release to turn new ideas into production-ready features.
